transmit tables with  
monitors

receive tables and  
local delivery circuits

in the background  
Chief of Centre and  
Operator's locker room

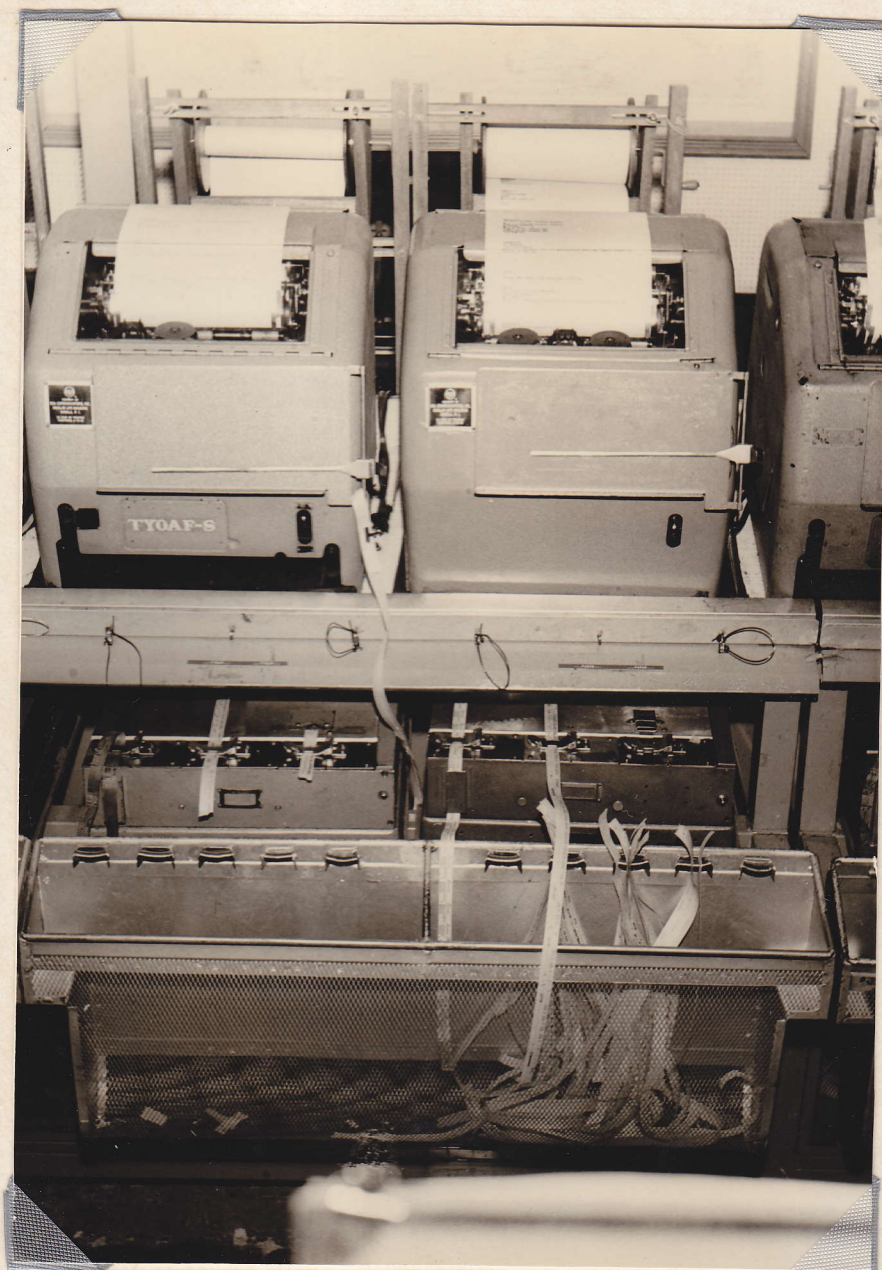

receive tables and  
local delivery circuits

transmit tables  
with monitors

in the background  
cabinet containing all  
technical installation

signal wires and power lines from  
the cabinet to the tables pass through  
the wire ducts and the false ceiling

typical transmit position

with M15 R/O monitors and MXD (3-gang transmitter)

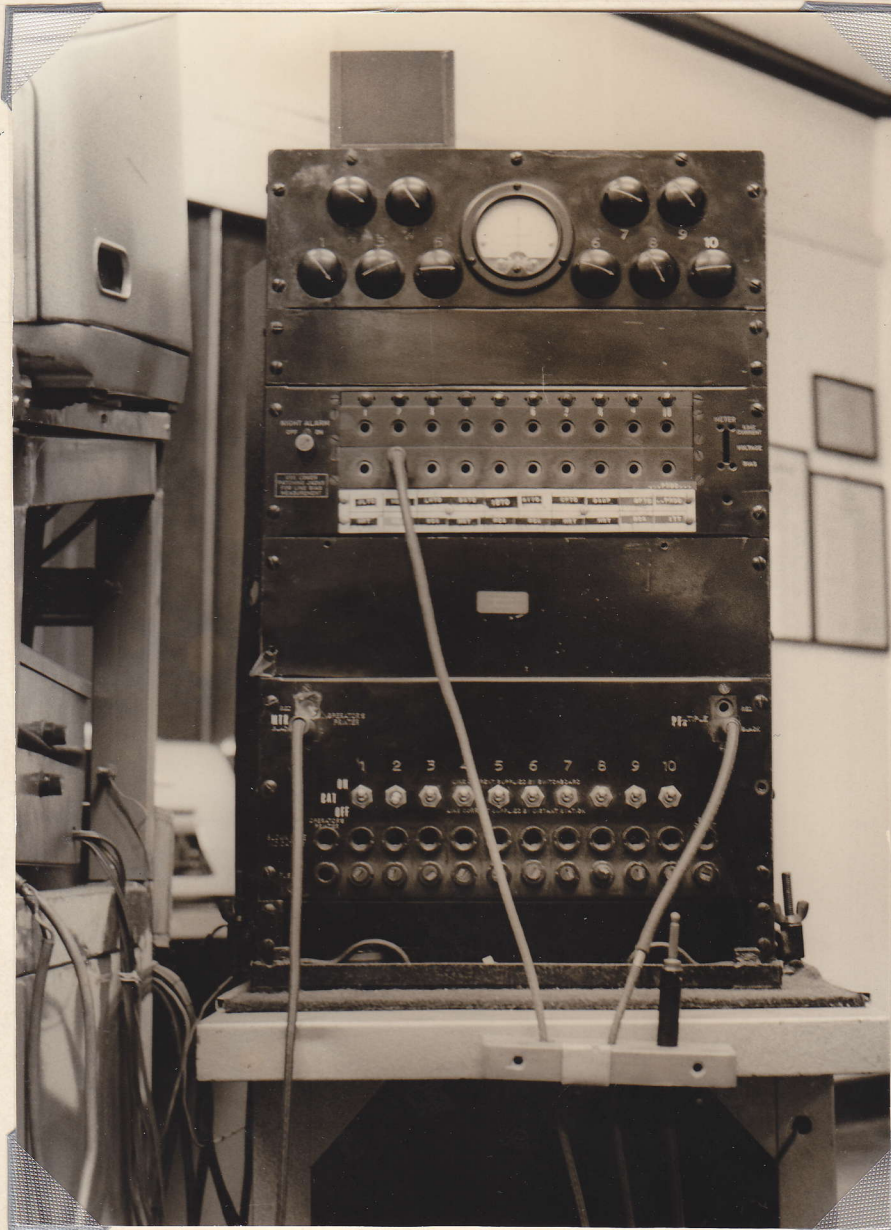

typical receive position

with M14 R/O reperforators; underneath local delivery circuits

(T100 ASR) mounted on slides

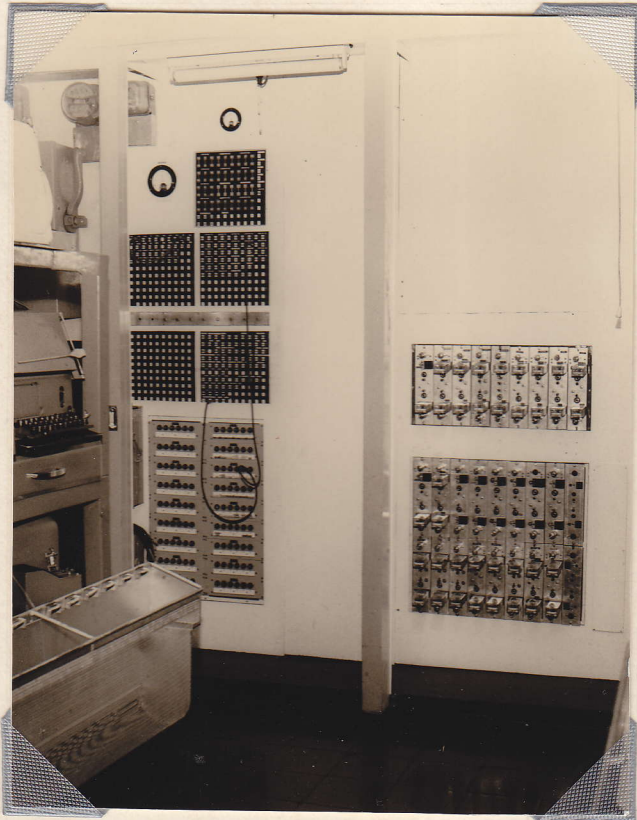

THE CONCENTRATOR

(BD-100)

because of its historical value (we guess)  
the Head Office  
did not find it in  
its heart to do away with this museum piece

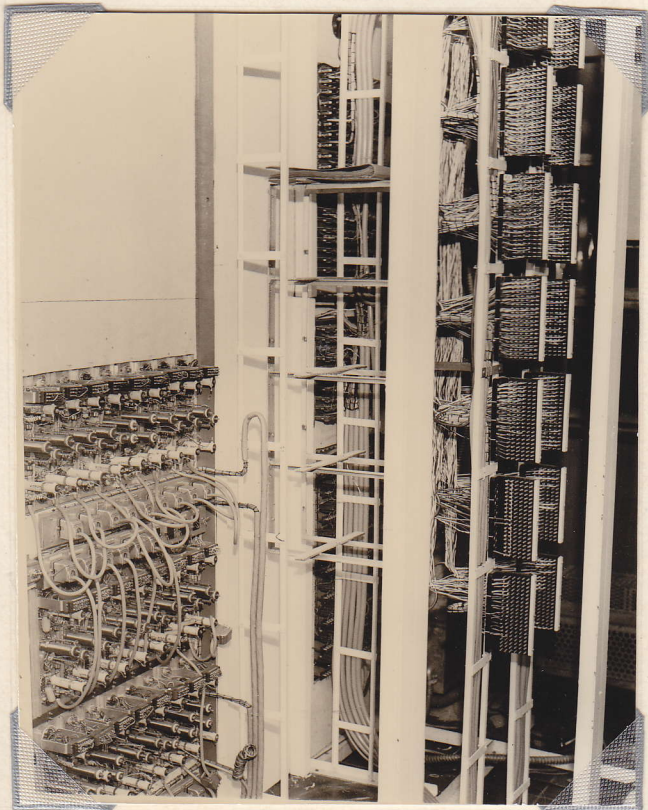

TECHNICAL INSTALLATION

Front View

Back View

commutation board, fuse  
panel, repeaters, and  
distribution frame

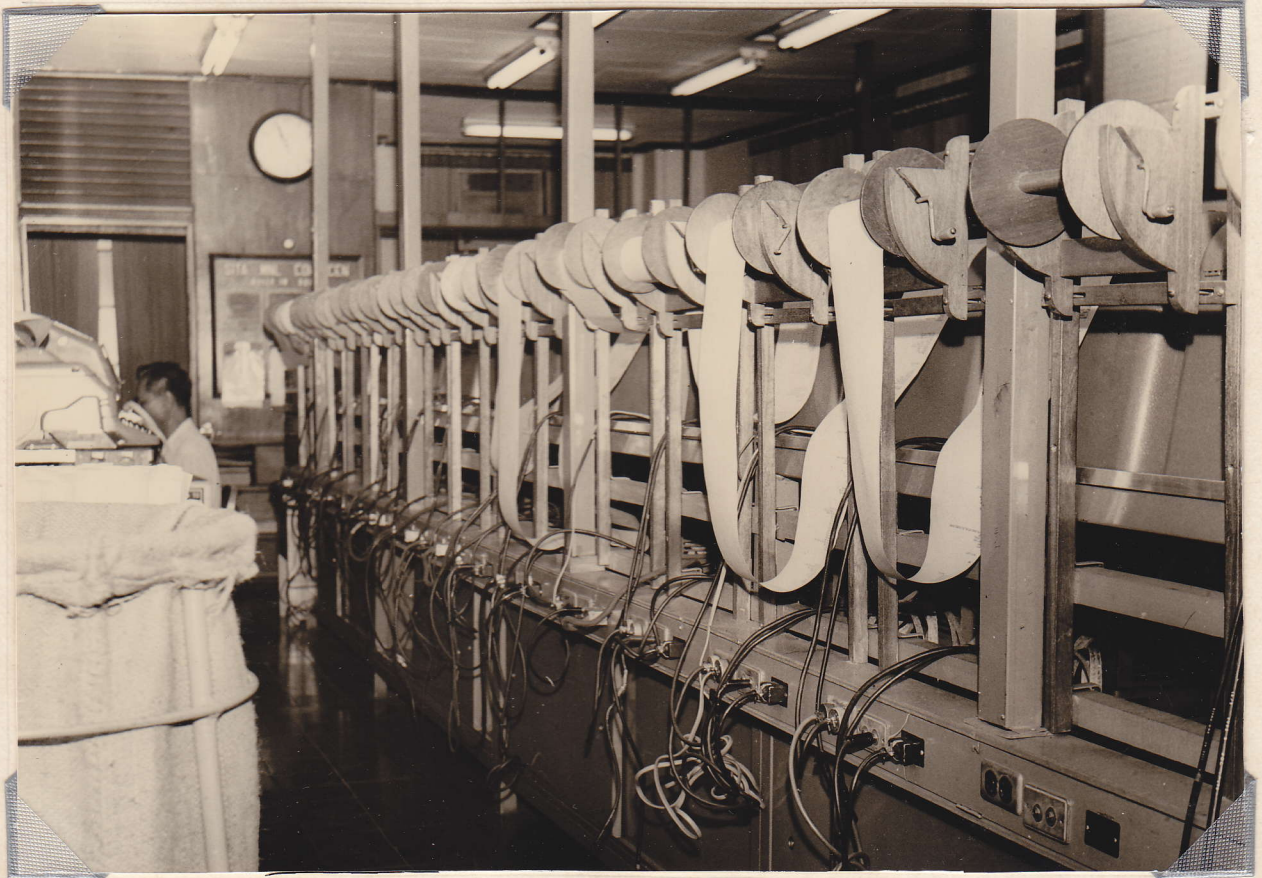

close-up on slides

back of the transmit/monitor tables

all wires hidden in wire ducts; sockets and jacks are mounted  
on wooden cover of trough which can be folded down
